

ABOUT LIFEOMIC

The Future of Precision Health

LifeOmic, a healthcare technology company, works with health care providers, researchers, and health-focused enterprises to aggregate and utilize health data to improve patient outcomes and provide valuable, actionable insights.

The LifeOmic Platform goes far beyond storage.

Our secure, cloud-based platform forms the technology backbone for aggregating and managing complex health data in oncology, cardiology, MedTech, Pharma and more. The user-friendly interface, configurable mobile app, real-time analysis and visualization and attribute-based access controls meet the needs of each individual or organization.

Easily Collect & Analyze Data to Enable the Best Treatment Decision

LifeOmic's Platform can pull massive amounts of data from siloed systems into one place.

The sophisticated visualization and filtering features make it easy to understand health trends and enable clinicians to design custom treatment plans utilizing data from EHRs, genetic tests, wearable devices and patient-reported outcomes.

Accelerate Speed to Market or Transition to Cloud with our Secure Platform

LifeOmic's Platform was developed to meet strict regulatory standards and is HIPAA compliant and HITRUST CSF. It allows controlled access to ensure health data is kept private.

Healthcare entities, medical device, wearable and pure software companies can all benefit from LifeOmic's platform features and data visualization tools.

Engage Patients & Users with our Configurable Mobile App

LifeOmic's mobile app enables patient and user engagement. Easily collect the data you need with medical and wearable device integrations, as well as surveys, eConsents, and more.

The app also offers an extensive content library with a wealth of educational resources, digital treatment binders, habit tracking, and social circles. Enable as many or as little features as you need.
